Notes on Release 1.5 of ZeTa

Wolfgang Grieskamp

This release supports the core functionality of the ZeTa system – type setting, type checking and executing Z specifications. In comparsion to the release 1.03 of November '98, the following changes have been made:

- ZeTa now runs under Java 1.2 and upwards (and only Java 1.2)
- numerous bug-fixes in the Z parser and type-checker
- numerous bug-fixes in the XEmacs and Swing GUIs
- a new execution machine and compiler
- system now under GPL

If you have used ZeTa before, be aware of the following incompatbilities:

- in this release, $\mu\mathcal{SZ}$ and Dynamic Z is not supported
- the `%%toolkit` directive is not longer required
- their is only one toolkit packed in this release (no unit-weighted numbers)
